Geovanne E. S. Biela

Java Back-End Developer (Intern / Trainee / Junior)

geovanneenzo8@gmail.com | +55 66 99652-3493 | Goiânia, GO, Brazil

GitHub: github.com/geovanneenzo8-maker

PROFESSIONAL SUMMARY

Systems Analysis and Development student at SENAI FATESG (Expected Graduation: July 2029) with a strong foundation in software engineering, Java programming, Object-Oriented Programming (OOP), algorithms, and data structures. Hands-on experience building RESTful APIs using Java 21, Spring Boot 3, Spring Data JPA/Hibernate, and relational databases (PostgreSQL, H2), applying concurrency control, automated integration testing (JUnit 5, MockMvc), Docker containerization, and CI/CD pipelines (GitHub Actions). Proven track record in technical-administrative support, workflow optimization, and cross-functional team collaboration at MAASTEC.

TECHNICAL SKILLS

Languages & Frameworks: Java (Java 17 / Java 21) • Spring Boot 3 • Spring Data JPA • Hibernate • Bean Validation • Maven

Back-End Engineering & APIs: RESTful APIs • Object-Oriented Programming (OOP) • Data Structures • Algorithms • Programming Logic • OpenAPI 3 (Swagger) • RFC 7807 Standard • Software Development Life Cycle (SDLC)

Databases: PostgreSQL • H2 Database • SQL • JPQL • Relational Data Modeling • ACID Transactions & Concurrency Control

Testing, DevOps & Tools: JUnit 5 • MockMvc • Integration Testing • Docker • Docker Compose • Git • GitHub • GitHub Actions (CI/CD)

Operations & Technical Support: Technical Documentation • Process Optimization • Ticket & Issue Resolution • Customer & Technical Support • Spreadsheets

SOFTWARE ENGINEERING PROJECTS

MentorFlow API — Tech Mentorship Marketplace & Scheduling Engine

Java 21 • Spring Boot 3 • PostgreSQL • Docker

Repository: github.com/geovanneenzo8-maker/mentorflow-api

- Engineered a layered RESTful API and transactional state machine for mentorship scheduling, documented with OpenAPI 3 (Swagger) and standardized global exception handling following RFC 7807 (`ProblemDetail`).
- Implemented concurrency control using JPA/Hibernate pessimistic write locking (`PESSIMISTIC_WRITE`) and request idempotency keys (`idempotencyKey`), preventing race conditions and double-booking conflicts.
- Built a financial payment-split engine (85%/15%) using `BigDecimal` with bank-grade rounding, atomic refund reversals (`@Transactional`), and an immutable audit trail (*Financial Ledger*).
- Prevented N+1 query bottlenecks via JPQL `JOIN FETCH` queries and developed an end-to-end automated integration test suite using JUnit 5, MockMvc, and GitHub Actions CI.

PROFESSIONAL EXPERIENCE

Junior Technical & Administrative Assistant • MAASTEC

2024 – 2026

- Delivered direct technical and administrative support to clients and partners via phone, email, and in-person channels, ensuring clear communication and rapid ticket resolution.
- Supported internal IT and operations teams by managing operational workflows, organizing technical documentation and materials, and coordinating logistical processes.
- Standardized administrative and operational procedures, maintaining daily routines that improved overall team efficiency and workflow consistency.

EDUCATION

Systems Analysis and Development — Bachelor of Technology (B.Tech)

Expected Graduation: July 2029

SENAI FATESG • Goiânia, GO, Brazil | In Progress

CERTIFICATIONS

Programming with Java

Introduction to Software Development
